# WYOMING WOOD & WORKS

## Our Wood

**W**yoming Wood 'N Works specializes in North American lumber, as well as exotic lumbers. We supply lumber of many species and cuts in rough stock, hardwood and softwood, and exotics. These include, but are not limited to: Oak, Maple, Birch, Hickory, Cherry, Alder, Pine, Butternut, Ash,

Cottonwood, Elm, Basswood, Hackberry, Aromatic Cedar, Osage Orange, Purple Heart, Zebrawood, African Mahogany, Sapele and many others. We offer lumber in many thicknesses, widths and lengths, including hard-to-find slabs of Walnut and Cherry.

## About Us

lumber store in Casper. We are currently working with six logging/sawmill operations, as well as operating our own logging/sawmill. We sell kiln-dried lumber, air-dried lumber and green lumber. We also pull roots of trees for base displays for hunting mounts and table bases. These are just a few of the wood items we offer.

**W**yoming Wood 'N Works was established in April 2003 by John Dierenfeldt, Jr. The company was established as a home remodeling, woodworking and lumber supply company. Since 2003, the company has expanded into woodworking and lumber sales.

Presently, Wyoming Wood 'N Works is a vital source for wholesale hardwood lumber, exotic lumber and various other types of lumber in the state of Wyoming and the Mountain West Region. On January 1, 2014, we took the next step in opening and operating a wholesale and retail

Wyoming Wood 'N Works is unique in that it has established relationships with wholesale lumber providers and has the capacity to produce the materials, as well. The logs are cut to the specifications needed, kiln dried (as needed) and shipped. This process allows the company to procure some of the most beautiful North American lumber available at a competitive price.

Wyoming Wood 'N Works currently boasts business relationships with more than 20 middle schools, high schools, trade schools and colleges throughout Wyoming, including Casper College. The students have helped to expand Wyoming Wood 'N Works' customer base as they themselves begin work in the woodworking trade.

Schools, hardware stores, construction companies, cabinet makers, oil companies, transport companies, cement companies, ranches, gun makers and hobbyists are all part of our clientele.

## Our Work

**W**yoming Wood 'N Works specializes in custom woodworking. Furniture is custom built to the specifications of each client while maintaining the artistic element of the furniture maker. Many companies call on Wyoming Wood 'N Works to build and design their projects.

The advantage of owning and operating its own lumber company allows us to use rare and beautiful lumber that is often hard to find.

Some examples of what we do include custom entry doors and interior doors, cabinets, cabinet doors, countertops, butcher blocks, benches, tables, custom staircases, handrails, mantles, pieces of art, desks, tables, floors, entertainment centers, fire-place surrounds, beds and end-tables. Almost any piece of woodworking is able to be meticulously crafted, finished and installed.
